Bandung, Indonesia

As an entry-level front-end developer, I am currently using React in my projects. I have gained valuable experience in web and mobile (Android) development through various projects and an internship as a UX designer. I am eager to continue my growth as a software development engineer and seek a role where I can utilize my technical skills and contribute to developing impactful software solutions.

Work Experiences

Prosa.ai - Bandung
Feb 2022 - May 2022

UX Designer Intern

Prosa AI is a startup company with expertise in Artificial Intelligence solutions, specializing in Bahasa Indonesia Natural Language Processing (NLP).

- Assisted a senior UX designer in the design of mobile applications
- Conducted user research as moderator with 10 Usability Testing Sessions
- Created wireframes, prototypes, and high-fidelity mockups using Figma
- Collaborated with product managers and a product owner to ensure that design solutions are feasible and aligned with business goals

LOKPRO Media - Remote
Aug 2020 - Oct 2020

Web Developer (Front End) Intern

LOKPRO Media is a social media platform that actively posts content about IT job opportunities and other related information in the field of information technology.

- Collaborated as front-end developer team to develop responsive and user-friendly websites using React JS.
- Contributed to the implementation of design and layout changes using Tailwind CSS
- Worked with back-end developers to integrate front-end code with server-side logic and APIs

Education Level

Institut Teknologi Bandung - Bandung, Indonesia
Aug 2017 - Dec 2022

Bachelor Degree in Information System & Technology

Skills, Achievements & Other Experience

- **Web Development Bootcamp with Impact Byte** (2020): Impact Byte's Web Development Bootcamp is designed to give students a comprehensive understanding of web development, from the front end to the back end. Over the course of the bootcamp, I built final projects using technologies such as React, Node.js, and Express, as well as database management with MongoDB.
- **Mobile (Android) Development Training Path from Bangkit Academy** (2021): The program offers mobile development training for Android developers, with a focus on using Kotlin as the main programming language.
- **Generasi Gigih Trainee** (2021): Generasi GIGIH provides various training programs for tech talents, including a back-end development path that focuses on Ruby as the primary programming language.
